KYAW MG MG LWIN

Full-Stack Developer

About Me

I'm a developer who loves transforming complex ideas into clean, intuitive digital experiences. I thrive on continuous learning and the creativity of building for the web. When I'm not coding, I'm exploring new tech, taking photos, or traveling. I'm always excited to connect and collaborate on meaningful projects.

Language

- Burmese
- English
- Love to learn new Languages

Expertise

- Backend Developement
- Frontend Development
- Database Management
- Microservice Architecture
- Cloud Technology (VPS, S3)
- PHP + Laravel
- Node + Express
- Molecular Service
- React JS + TypeScript
- Bootstrap + Tailwind
- Ollama + Qdrant
- MySQL + ORM + Primsa
- Git + GitHub + GitLab

Experience

One Project One Month
2024 - April 2025

Since 2024, I've been part of a lifelong community dedicated to coding, design, and developing life-saving software. This experience has continually sharpened my engineering and design skills through close collaboration with talented developers and designers.

Studio AMK (Match 2025 - November 2025)

I contributed to building AI-driven bots and software services, developing REST APIs with Node.js and Moleculer, creating responsive UIs using React and Tailwind CSS, and integrating AI tools like Qdrant and Ollama. I focused on performance and accessibility improvements while collaborating closely with designers and DevOps engineers.

Education

Basic Education High School Ngazun

Graduated Matriculation Exam
2019 - 2020

Fairway Technology

Basic Programming Course _ 2024
Professional Programming Course _ 2024

Turing Programming Training Center (Sayar Thet Khaing)

JavaScript (Full_Stack) _ 2024

Skills Summary

POS System (Real-World)
